

CEEP/2014/235

Brussels, 18th of July, 2014

Mr. Jean – Claude Juncker
President of the European Commission

Dear President,

Being aware of your keen interest in the EU energy policy issues, I would like to take the liberty to attach to this letter a copy of CEEP's recent presentation before the EU-US TTIP negotiating teams.

On 16th July, 2014 over 70 organisations have had an opportunity to address the TTIP negotiators and acquaint them with the views and opinions of their respective stakeholders. CEEP presentation has been the only one devoted to energy and energy intensive industry concerns, which we consider to be of great importance in the course of TTIP negotiations.

I hope you will find the enclosed document useful and interesting. I want to assure you that our association intends to follow in, respond and contribute to the debate regarding negotiations of EU-US free trade agreement. We have and will actively participate in TTIP consultations and work closely with the respective DG's, with the aim of assisting the Commission in this ambitious and difficult task.

Yours sincerely,
